Intersessional Report of the IWC: 2018-2022

I am pleased to announce that the IWC Intersessional Report for 2018-2022 is now available [here](#).

As you may recall, the Intersessional Report is circulated approximately one month before the IWC biennial meeting. It aims to provide both a summary of the work undertaken between Commission meetings, and a general introduction for anyone wishing to learn about the organisation.

In order to produce a document that is short and accessible it is not possible to include every project in which the IWC has been involved, especially during this unprecedented, four-year intersessional period. Nevertheless, I hope you will find it a useful summary and a showcase for the impressive progress made despite the challenges of the pandemic.

Consistent with our commitment to reduce paper, printed versions will not be supplied by the Secretariat. The report is designed to be easy to read on screen and also to print should anyone wish to do so. Please note it is best downloaded and viewed or printed as a PDF rather than through a web browser which may distort some of the formatting.

We look forward to seeing you at the Commission meeting 14-21 October 2022, at which we will be reviewing these areas of work and planning the next two years.

Andrej Bibic
Chair, IWC
