

INFRACTIONS SUB-COMMITTEE,

ANNOTATED DRAFT AGENDA

Thursday 11th September 2014

The Infractions Sub-committee considers matters and documents relating to the International Observer Scheme and Infractions insofar as they involve monitoring of compliance with the Schedule and penalties for infractions thereof (Rep. int. Whal. Commn 29: 22).

1. INTRODUCTORY ITEMS

1.1 Appointment of Chairman

Lars Walløe (Norway) is proposed

1.2 Appointment of Rapporteur

Cherry Allison (Secretariat) is proposed.

1.3 Review of Documents

To date, the following documents have been submitted to the sub-committee.

Document No.	Title	Agenda item	On website?
IWC/65/INF 01	Revised Draft Agenda		Yes
02	Secretariat: Annotated Draft Agenda	1-8	Yes
03	Secretariat: National Legislation Details Supplied to the Commission	6	Yes
04	Secretariat: Draft Summary of Infraction Reports Received by the Commission for 2012 and 2013	3	Yes

2. ADOPTION OF THE AGENDA

In previous years under this agenda item Norway, Japan and Iceland have referred to the terms of reference and stated their belief that Item 7.1, covering stockpiles of whale products and trade questions, is outside the scope of the Convention. Consequently, they have proposed that this item be deleted. The USA and New Zealand have not agreed with this view. Nevertheless, in previous years, it has been agreed that an exchange of views was nonetheless useful.

3. INFRACTIONS REPORTS FROM CONTRACTING GOVERNMENTS

In 2006 at IWC/58, the Sub-committee adopted a revised form for reporting infractions, including reporting details of any infractions committed in previous years that remain unresolved. This revised form was circulated to Contracting Governments by the Secretariat. While use of the form is not compulsory, Contracting Governments do have to fulfil their reporting obligations under Article IX.4 of the Convention.

3.1 Reports for 2012 and 2013

The infractions reports from Contracting Governments for 2012 and 2013 are summarised in IWC/65/INF04, Tables 1-2.

3.2 Follow-up on earlier reports

Information on the unresolved infractions from previous seasons are reported in IWC/65/INF04, Table 3.

4. SURVEILLANCE OF WHALING OPERATIONS

The Infractions Report submitted by the USA, the Russian Federation and St. Vincent and the Grenadines stated that 100% of their catches are under direct national inspection. Catches by Denmark (Greenland) are subject to a random check (1%). In 2012, 17.3% of the catch by Iceland was under direct national inspection; in 2013, 5.3% was under direct national inspection and 4.7% was under inspection under an international program.

5. CHECKLIST OF INFORMATION REQUIRED OR REQUESTED UNDER SECTION VI OF THE SCHEDULE

This Checklist was developed as an administrative aid to the Sub-committee in helping it to determine whether obligations under Section VI of the Schedule were being met. It is not compulsory for Contracting Governments to fill in the Checklist although, of course, they do have to fulfil their obligations under this Section of the Schedule.

The available information is summarised below:

Denmark: Information on date, species, length, sex, whether the whale is lactating and the length and sex of any foetus if present is collected for between 73-100% of the catch, depending on the item. The position of each whale killed is collected for 58-68% of the catch and the name of the area where whales are hunted is reported for the remainder. Information on killing methods and numbers of struck and lost animals are also collected.

USA: Information on date, time, species, position, length, sex, the length and sex of any foetus if present, killing method and number of struck and lost is collected for 67-100% of the catch. Biological samples are collected from at least 53% of animals.

Russian Federation: Information on date, time, species, position, length, sex, whether the whale is lactating, killing method and numbers struck and lost is collected for 100% of the catch. Biological samples are collected from about 45% of animals.

St. Vincent and the Grenadines: Information on date, time, species, position, length, sex, the length and sex of any foetus if present, whether the whale is lactating, killing method and numbers struck and lost is collected for 100% of the catch. Biological samples are collected.

Norway and Iceland: the required information has been submitted to the Secretariat as noted in the Scientific Committee report (IWC/65/Rep 1 (2013) and (2014)).

6. SUBMISSION OF NATIONAL LAWS AND REGULATIONS

A summary of national legislation supplied to the Commission is given as IWC/65/INF03. Chile and Denmark (Greenland) have submitted legislation since the IWC/64 meeting.

7. OTHER MATTERS

7.1 Reports from Contracting Governments on availability, sources and trade in whale products

The Commission has adopted a number of Resolutions inviting Contracting Governments to report on the availability, sources and trade in whale products:

- 1994-7 on international trade in whale meat and products
- 1995-7 on improving mechanisms to prevent illegal trade in whale meat
- 1996-3 on improving mechanisms to restrict trade and prevent illegal trade in whale meat.
- 1997-2 on improved monitoring of whale product stockpiles.
- 1998-8 *inter alia* reaffirmed the need for Contracting Governments to observe fully the above Resolutions addressing trade questions, in particular with regard to the problem of illegal trade in whale products, and urged all governments to provide the information specified in previous resolutions.

This agenda item provides the opportunity for Contracting Governments to provide the information specified in these Resolutions.

7.2 Other

To date, no country has indicated that it wishes to raise anything under this item.

8. ADOPTION OF REPORT
