*Animal was released alive. **Stranded, but cause of death attributed to incidental capture. ¹ Small type whaling statistics based on reports of biologists and gunners. Other fisheries based on reports of fisheries agencies, individual fishermen or fishery cooperative unions. ² Most catches off Hokkaido were landed as meat by fishermen and converted into individual number of *dalli*-type Dall's porpoise using a rate of 50g/porpoise. ³ Taken by a research vessel within the Japanese FZ. ⁴ Under permits issued by SEMARNAP these individuals are being kept in captivity at recreational facilities.
